

Public Health care

Preparing for the Next Crisis

Successful public/private collaboration for vaccines greatly reduced deaths

Source: The Conference Board and the CDC COVID-19 Rapid Response/Epidemiology Task Force, 2022

Public and private leaders need to collaborate closely to minimize disruptions to the economy, make workplaces safe, and rapidly mitigate the pandemic's spread.

LESSONS LEARNED FROM COVID-19

Determine essential businesses, and what is needed to operate safely in person and remotely.

Build public-private global biosurveillance for future variants.

Develop business plans for future disruptions.

Reform The Centers for Disease Control.

Rebuild and revitalize the health care workforce.

Expand genomic sequencing of positive tests.

Expand private sector distribution systems for vaccines.

Rebuild the Strategic National Stockpile in collaboration with the private sector.

Reform regulations by reviewing waivers and emergency use authorizations.

Restore trust in public health.

Invest in life sciences, R&D.
