Committee for Economic Development

The Committee for Economic Development of The Conference Board (CED) is a nonprofit, nonpartisan, business-led public policy organization that delivers well-researched analysis and reasoned solutions to our nation's most critical issues.

Since its inception in 1942, CED has addressed national priorities that promote sustained economic growth for the benefit of all Americans. CED's work has helped shape economic policies and initiatives that include the Marshall Plan and the Bretton Woods Agreement; campaign finance and education reform; and short- and long-term challenges to our nation's fiscal health and free enterprise system. CED's research findings are linked with programs throughout the country, achieving tangible impact at the local, state, and national levels.

Our nation requires inspired business leadership to reach the goals that we all share, including increased economic growth and educational opportunities. We need reasoned dialogue to address these civic challenges, and strong business leaders to support, influence, and advance the discussions.

The *Distinguished Performance Awards Dinner* honors business leaders who have answered CED's call for leadership. We are proud to highlight our history of engaging business leaders in public policy, and look forward to recognizing the many companies and individuals who continue that legacy.
