Ensure energy security
- US as a reliable energy supplier to allies; increase production of oil and gas in near term, reform permitting, work with US fossil fuel producers as partners.
- Natural gas as transition fuel; build pipelines and export terminals with dual capacity for hydrogen.

Accelerate clean energy transition with incentives and R&D
- Use incentives in IIJA and Inflation Reduction Act as a catalyst for increased investment in R&D in nuclear, hydrogen, wind, solar, energy storage, and carbon capture.
- Encourage use of nuclear power, including newer designs.
- Seek to develop US carbon market plan; reduce methane.
- Prioritize power grid reliability; promote circular economy.

Implement smart regulation for innovation and growth
- Avoid mandates that distort markets and harm innovation in new technologies.
- Implement periodic regulatory reviews.

Provide international leadership
- Promote global cooperation, especially with China and India, to achieve Paris Agreement goals and preserve US competitiveness.
- Provide assistance; meet Global Methane Pledge.

Goals for net zero emissions in Paris Agreement
- US: no later than 2050
- EU: 2050
- China: 2060
- India: 2070
