

Securing Cyberspace

In an era of evolving threats...

Every **39 seconds**—there's a cyberattack in the US.

Less than **40%** of CEOs believe their organizations are prepared to meet challenges related to a major cybersecurity crisis.*

76% of companies reported a ransomware attack in 2021.

\$4.6 billion = the average cost of a ransomware breach in 2021.

\$.33 billion

...public & private collaboration must build resiliency

- Unify and streamline the federal approach to cybersecurity
- Quickly implement CIRCIA (act passed in March 2022)
- Develop, validate, and promote cybersecurity standards
- Implement fundamental protection and redundancy/resiliency in the private sector
- Expand resources for small - and medium-sized organizations
- Attract new and diverse talent to the cybersecurity workforce
- Create a federal, virtual, national academy for cybersecurity
