

## Every Other One: More Women on Corporate Boards

The Committee for Economic Development (CED) is pleased to announce “Every Other One: More Women on Corporate Boards,” an initiative focused on board diversity and women’s economic empowerment.

As part of this initiative, CED will organize individual and small group meetings with CED Trustees and members of nominating committees of Fortune 500 companies that have boards with less than 30% women. By 2018, women can represent 30 percent of Fortune 500 board seats if a woman fills every other newly open board seat, and there is no loss of current female directors.

CED would like to thank the following companies and individuals for providing an initial contribution to the advancement of women on corporate boards.

### LEADERS

**George S. Barrett**  
Cardinal Health, Inc.

**Carl T. Camden**  
Kelly Services, Inc.
