
How can our education system give students the skills they need to succeed in the workforce? Read our new report: https://bit.ly/2uVjwGC

There’s a big gap between what employers want in new hires and what our education system delivers. Read more: https://bit.ly/2uVjwGC

@CEDupdate has released five recommendations for boosting workforce readiness. Check out the new report: https://bit.ly/2uVjwGC

Focusing on soft skills can better prepare students for success in the workforce. Read our other 4 recommendations: https://bit.ly/2uVjwGC

Students, schools, governments, and businesses need an intermediary for better communication on workforce readiness https://bit.ly/2uVjwGC

To succeed in the workforce, students need more work-based learning opportunities. Read our 4 other recommendations: https://bit.ly/2uVjwGC

Our education system is not producing the type of workers employers need. Learn how we can boost workforce readiness https://bit.ly/2uVjwGC

Success in the workforce hinges on success in the education system. But recent discussions with business leaders reveal that there is a gap between the skills that employers look for in new hires and what our education system is delivering. Read the Committee for Economic Development’s five new recommendations for workforce readiness based on these conversations: https://bit.ly/2uVjwGC

How can our education system better prepare students for success in the workforce? Governments, the business community, schools, students, and parents need an intermediary to foster collaboration and sharing of information regarding career opportunities. Students also need more work-based learning opportunities and a greater focus on the development of soft skills. Learn more in the new report from the Committee for Economic Development: https://bit.ly/2uVjwGC

The Committee for Economic Development just wrapped up conversations on workforce readiness with business leaders and parents in five communities across the country. They revealed that there’s a large gap between what employers and parents want and what our education system is delivering. Based on these discussions, CED has issued five recommendations for closing the skills gap: https://bit.ly/2uVjwGC
To boost workforce readiness, schools should focus on developing students’ soft skills, such as honesty, problem solving, and time management. Check out the new report from the Committee for Economic Development for our other recommendations for improving workforce readiness: https://bit.ly/2uVjwGC

Students need more opportunities for work-based learning in order to prepare for success in their future careers. Business leaders and governments should work together to provide these opportunities. Check out the Committee for Economic Development’s other four recommendations for boosting workforce readiness: https://bit.ly/2uVjwGC

A large gap exists between the skills that employers look for in new hires and what the education system delivers. To close this gap, stakeholders – such as governments, businesses, schools, students, and parents – need an intermediary to foster better collaboration and communication. Check out our other recommendations in the latest report from the Committee for Economic Development: https://bit.ly/2uVjwGC
